AUDITS

AUDIT SUMMARY

ULTRON N Ultron Foundation is building a new decentralized autonomous organization that manages the transfer of ERC20, ERC721, and ERC1155 tokens between chains.

For this audit, we reviewed the project team's contracts at commit [954793173fb0e1767461bae001d17ca780c](#) on the team's GitHub repository.

AUDIT FINDINGS

Please ensure that the team prior to investing as they have some control in the ecosystem.
Date: May 20th, 2022

Finding #1 - DAO - Low

Description: `setBridgeContractAddress()` can be called externally by anybody.
Risk Impact: If the bridgeContract address is not set immediately, there is a risk that it will be set to an unknown contract address.
Recommendation: The team should restrict the use of this function.
Resolution: The team has not yet addressed this issue.

CONTRACTS OVERVIEW

All the contracts are implemented with Solidity v0.8.11, they are safe from any possible overflows/underflows.

* ULX Price is a projection based on normal economic factors influencing the price of cryptocurrency just like any other currency or investment: supply and demand, public sentiment, the news cycle, market events, scarcity, and more. In no case can a price projection be understood as a promise or assurance of market-dependent price movements."

Ultron Growth Strategy

We are going to talk about money but: 1. We are NOT financial promoters. 2. We DON'T talk about investments. The following presentation is just to disseminate and is NOT to provide suggestions on financial products and for public money saving. Ultron is not a financial advisor, does not suggest financial tips of any type, neither collects investments from appointed personnel and/or clients. For this reason, this slide does not care about possible ROI, automated or not, or other public saving activities. This kind of declaration and/or example shown in the compensation plan represents a simple evaluation of how much an affiliate could generate or gain at the beginning and must not be intended as a guarantee of gains. Each member must develop his/her own strategy before putting his community and private club. Indeed no certainty is assured for the member to receive rewards and/or profits for a certain period of time and from the tokens sales volume developed by the affiliate along with his/her team; and/or some unpredictable external factors could affect results/rewards independently from the affiliate's contribution. This presentation along with its compensation plan are copyrighted and must not be reproduced, distributed or presented to any third party. If it is reproduced, distributed or presented to any third party, we request that it is removed from the product.
